NUMBER OF CATTLE FEEDLOTS BY SIZE GROUPS AND NUMBER OF FED CATTLE MARKETED 1962-1967

SRS - 14

The number of cattle feedlots in the 32 major cattle feeding States with a capacity of 1,000 head or more totaled 2,008 during 1967, an increase of 32 percent since 1962. The number of fed cattle marketed out of feedlots with 1,000 head or more capacity totaled 9,854,000 head in 1967, an increase of 77 percent from the 5,572,000 marketed in 1962. Cattle feedlots with a capacity of under 1,000 head totaled 209,505 during 1967. This was 11 percent less than the 234,646 such feedlots in 1962. Fed marketings out of these feedlots totaled 11,825,000 head in 1967.

The number of cattle feedlots with a capacity of 32,000 head or more was only 5 lots in 1962 compared with 13 in 1967. Lots with this capacity marketed 946,000 head during 1967 compared with 314,000 head during 1962.

Cattle feedlots with a capacity of 16,000 to 31,999 head increased from 26 in 1962 to 59 during 1967. Fed marketings in this size group increased nearly $2\frac{1}{2}$ times during this period to 2,124,000 head in 1967. The number of lots with a capacity of 8,000-15,999 head increased from 106 in 1962 to 153 in 1967. Cattle marketed from these lots increased 42 percent during this period to 2,166,000 head in 1967. In the 4,000-7,999 head size group, the number of feedlots increased 61 percent to 313 lots in 1967. Marketings from these feedlots were up 71 percent from 1962 and totaled 1,947,000 head during 1967.

Feedlots with a capacity of 2,000-3,999 head totaled 510 lots in 1967 compared with 385 in 1962. Cattle marketed from these lots increased 74 percent during this period to 1,462,000 head in 1967. The number of feedlots with a capacity of 1,000-1,999 head was 960 in 1967, an increase of 159 lots since 1962. Fed cattle marketed from these lots during 1967 totaled 1,209,000 head, 35 percent above 1962.

During 1967, fed cattle marketings from all feedlots in these 32 States totaled 21,679,000 head. Of this total, lots under 1,000 head capacity accounted for 54 percent; 1,000-1,999 head, 6 percent; 2,000-3,999 head, 7 percent; 4,000-7,999 head, 9 percent; 8,000-15,999 head, 10 percent; 16,000-31,999 head, 10 percent; and lots with 32,000 head capacity and over, 4 percent.

1/ Number of feedlots with 1,000-head or more capacity is number of lots operating any time during year. Number under 1,000-head capacity and total number of all feedlots is number at end of year.

2/ The 32-State totals show actual number of feedlots and number of animals marketed in each size group. The sum of numbers shown by States under any specific size group may not add to the 32-State total for that size group, since for some States size groups are combined to avoid disclosing individual operations.

3/ Lots and marketings from larger size groups are included to avoid disclosing individual operations.

NA indicates that data are not available.

1/ Number of feedlots with 1,000-head or more capacity is number of lots operating any time during year. Number under 1,000-head capacity and total number of all feedlots is number at end of year.

2/ The 32-State totals show actual number of feedlots and number of animals marketed in each size group. The sum of numbers shown by States under any specific size group may not add to the 32-State total for that size group, since for some States size groups are combined to avoid disclosing individual operations.

3/ Lots and marketings from larger size groups are included to avoid disclosing individual operations.
